

# White-letter Hairstreak

*Satyrrium w-album*

Regional Priority: Medium  
Of Conservation Concern in Nottinghamshire

## Distribution 2000 - 2004

### Foodplants

Wych Elm (*Ulmus glabra*), English Elm (*U. procera*) and Small-leaved Elm (*U. minor*).

### Habitat

Hedgrows, woodland edges, and scrubby land where Elms grow. Will breed on sucker regrowth after dieback from Dutch Elm Disease. Adults spend most time in the canopy feeding on aphid honeydew, occasionally descending to nectar on flowering plants.
